## SUMMARY

Principal Technical Writer with 10+ years of experience crafting clear, user-focused content for on-premises and SaaS software products. I specialize in end-user documentation, context-sensitive in-product help, and microcopy that guides users through key tasks. I partner with product and engineering to turn complex features into simple, actionable guidance that boosts adoption and reduces support load.

## EXPERIENCE

November 2021 – Current
**Principal Technical Writer,** *PTC Software*

- Led Windchill+ onboarding documentation for administrators and users, defining task flows, procedures, and usability guidance.
- Built the Windchill+ SaaS help center end to end (information architecture, content strategy, build/deploy) and shipped UI/UX upgrades (welcome page, color-coded notes, spacing) plus search enhancements.
- Authored and published new features for Windchill on-premises help (including videos); added What's New, RTFs, and integration use cases for Digital Thread scenarios.
- Drove cross-functional reviews with PM, Engineering, and QA (Windchill and Atlas); coordinated localization with same-day query resolution; upheld PTC UI text standards.
- Maintained SPR SLAs; executed impact analysis and technical reviews; ensured build integrity (no DITA errors or broken links); supported platform help center operations.
- Advanced AI-assisted authoring (API Description pilot); prototyped Copilot/VS Code/Git automation to generate REST API What's New and first drafts of feature stories; shared findings with stakeholders.
- Used Google Analytics and Customer Feedback (CFB) to prioritize fixes and content refactoring.
- Created onboarding and feature-specific videos for Windchill.
- Mentored interns and peers (Windchill fundamentals, installation, and translation).

June 2018 – November 2021
**Senior Technical Writer,** *24/7 Software*

- Designed and updated user and administrator guides for 24/7 Software products.
- Created user guides for mobile applications and API references.

- Coordinated with PMs, engineers, and Customer Success teams to deliver customer-facing documentation.
- Managed multiple projects, ensuring documentation met customer requirements.

June 2011 – June 2018
**Team Leader,** *Cyient Ltd.*

- Led a team of writers to deliver user documentation.
- Migrated legacy content to structured formats.
- Delivered projects on schedule with improved quality.
- Analyzed aircraft maintenance and reliability data to find the root cause of flight interruption.

---

## EDUCATION

- BSc, AME Singhania University, Jhunjhunu (June 2015 – June 2016)
- Aircraft Maintenance Engineering (AME) APAA, Hyderabad (January 2008 – May 2011)
- Diploma in Computer Software Pronet, Nagpur (June 2005)

---
